PROFESSIONAL SUMMARY

BSc (Hons) Computing student with hands-on experience across the software development lifecycle: backend systems, web applications, automation, and data handling, built using Python, Java, and JavaScript-based stacks. Comfortable working across the stack: relational and NoSQL databases, REST APIs, and responsive front-end interfaces, with role-based access control and full project ownership from design through deployment. AWS Academy Graduate (Cloud Foundations, Data Engineering, and Machine Learning Foundations). Seeking an entry-level IT / software development role to apply strong technical fundamentals and continue growing as an engineer.

EDUCATION

BSc (Hons) Computing 2023 – Present

Islington College, Kathmandu affiliated with London Metropolitan University
Kamal Marg, Kamalpokhari, Kathmandu

+2, Science (Higher Secondary Education) 2021 – 2023

Damak Multiple Campus National Examination Board (NEB)
Damak, Jhapa

PROJECTS

Blog Multi-Role Blogging Platform ([GitHub](#))

- Built a full-featured blogging platform in Python supporting four distinct user roles Admin, Manager, Editor, and Author each with its own permission set.
- Implemented role-based access control governing who can create, edit, approve, and publish posts.
- Designed the content workflow end-to-end, from drafting through review to publishing.

Food Calorie Counter ([GitHub](#))

- Developed a Django web app that lets users log meals and track daily calorie and nutrition intake.
- Integrated a third-party nutrition API to pull real-time food and nutrient data into the app.

Ekantipur Scraper ([GitHub](#))

- Built a Python web scraper to extract and structure news articles from the Ekantipur news portal.
- Handled pagination and parsing logic to automate collection across multiple pages.
- Cleaned and structured the scraped data for reliable downstream use.

AI Coursework ML Experimentation ([GitHub](#))

- Completed a machine learning coursework project in Jupyter Notebook covering data preprocessing, model training, and evaluation.
- Applied Python data analysis libraries to build and assess ML models, reinforcing concepts from AWS Academy's Machine Learning Foundations track.

TECHNICAL SKILLS

Languages: Python, Java, PHP, JavaScript

Frameworks: Django, Laravel

Web Technologies: React, Node.js, HTML, CSS

Databases: MySQL, MongoDB, SQLite

Tools & Platforms: Git, GitHub, REST APIs, Postman, AWS

SOFT SKILLS

Communication, Adaptability, Team Collaboration, Problem Solving, Time Management, Fast Learner
